

**Amendments to the Specification and Abstract:**

Please replace the paragraph beginning on page 9, line 14, with the following rewritten paragraph:

Next, a process will be described in which holographic recording is performed on the above holographic recording medium 10 to form a ~~white light~~ white-light reconstruction hologram and a Fourier hologram.

Please replace the paragraph beginning on page 16, line 1, with the following rewritten paragraph:

~~holographic recording~~ recording region is formed to be 2  $\mu\text{m}$  to 80  $\mu\text{m}$  thick, and the Fourier holographic recording region in which data are recoded is formed to be greater than or equal to 100  $\mu\text{m}$  thick, thereby obtaining a holographic recording medium that is abundantly decorative and capable of storing a larger amount of data.

Please replace the Abstract with the attached amended Abstract.
